

3rd Year target setting after the mock exams

Review your results and note how they compare to Christmas. Have you made progress? If so, what helped you? If not it is time to act, and set some realistic targets for June. Be realistic about your targets and speak to your teachers in the subject areas and write down specific measurable goals for yourself.

Some tips

- Ensure you are following a study plan; these were completed in Tutor Time at the start of the year. Speak to your form teacher if you still need one and write a new one and use it.
- Review the mock paper carefully. Where did you go wrong? What questions got good marks and why? At this stage exam technique is important and knowing the marking scheme. Learn from where you went wrong and ensure you do not make the same mistakes in June.
- Review the areas you did not perform well in the mocks first. If these questions come up in June, you will be ready for them.
- Is your time management an issue? This was your first full exam paper in exam conditions. Did you manage your time correctly and get all questions done in time? If not focus on doing exam questions under time pressure.
- When studying, set a goal e.g, by the end of this session; 30 mins, I want to be able to attempt this question... study, then try an exam question on what you have covered in the same time as you have in the exam.
- Each exam is different so ask your teachers for tips for each subject.

Subject	Result	The Result I want	How I can improve on this result and achieve my goal
